A Word About Risk

All investments involve risks, including possible loss of principal. As with any stock fund, the value of your investment will fluctuate in response to stock market movements. Funds whose investments are concentrated in foreign countries may be subject to fluctuating currency values, different accounting standards, and economic and political instability. The value of the fund may be affected by changes in exchange rates between foreign currencies and the U.S. dollar. Investments in emerging markets may be more volatile than investments in more developed markets.
